

3. What plans do you have for your education beyond high school?
4. What is the main reason for wanting to take Advanced Chemistry II?  
(If extra space is needed, you may write your response on a separate sheet of paper and attach it to the application form.)

**STUDENT COMMITMENT AND PARENTAL CONSENT:** Please read and sign the statement below, indicating your understanding of the course.

The Advanced Chemistry II class is taught using college level chemistry labs that after completing each lab, students are required to write up results and conclusions, record them in their notebook, and produce a detailed lab report. Besides laboratory experimentation, chemical nomenclature, molecular structure, organic chemistry, and other higher chemistry learning skills are incorporated into the Advanced Chemistry II curriculum.
